PROJECTS

BIKE SHARING ANALYSIS

April 2022 - May 2022

- Utilized R programming to analyze and predict the bike count required at each hour for the stable supply of rental bikes in the USA amid the challenges posed by the COVID-19 pandemic, which has led to a decrease in income.
- Utilized Python to analyze and visualize by using Pandas, Numpy, Matplotlib, and Scikit-Learn (linear regression, ridge regression).

PLANT SEEDLING CLASSIFICATION

Sep 2022 - Nov 2022

- Utilized **Python** to differentiate a weed from a crop seedling that contained images of approximately 960 unique plants belonging to 12 species at several growth stages.
- Performed data normalization and feature extractions of each images in data preprocessing.
- Generated the model for plant seeding classification by using kerras, and the final model had an accuracy of 90%.

Power BI & SQL Project

May 2023

- Experiment with using **SQL (software: SQL Server)** to store, query, and manipulate data, then create the dashboard using **Power BI**.
- Analyzed key indicators for pizza sales data to gain insights into business performance.

Web Scraping Project

Oct 2023 - Nov 2023

- Utilized **Python** to extract data from the top 5 IT job search websites in Thailand to assess the current market demand by using **Beautiful Soup** and **Selenium**.
